

I listen to K-Love Radio at 91.3 FM and have been listening and supporting K-Love for 4 years. This radio station provides me and my family music that can only be found on K-Love. I don't have to worry about foul language, questionable humor or songs with negative lyrics. It also provides us with news including positive stories you won't find on other radio stations. In addition, I am not at the mercy of advertisers trying to sell cars, beer, or twinkies to me and my children. K-Love serves me by giving me an alternative to what society dictates as popular and it is a privilege to support this station. K-Love also serves the community in the same way, by being a positive alternative for many who are offended by what is considered mainstream with foul language, crude humor and/or sexual innuendo. Shock jocks seem to be all the rage today and K-Love provides an alternative that is safe for my children. If K-Love is forced off the air by the LPFM rule, we and our local community (San Antonio) will lose the only positive radio station available to us. Yes, there are soft rock radio stations out there. But they don't offer the positive encouragement K-Love does and don't offer the same kind of music. I know, I have scanned the dial. Unfortunately positive music is not "sexy" and therefore not popular to advertisers. If you force K-Love off the air, it will be replaced with what sells, which is more of the same. K-Love radio serves the public interest by being the only radio station in the community to offer positive encouragement. Please allow me, my family and my community to keep the right and privilege to choose the music we listen to by not forcing K-Love off the air with the LPFM rule. I realize it is a national station not located in San Antonio, but it feels like a good local friend, an Oasis for my family on the FM dial.
